Chat application - Redis implementation

- Aditya Kumar
  Chief Technology Officer, edwisor.com

We will cover with the following concepts

1) Using redis to keep a track of online users

Using redis is very easy

1) Install redis in your computer

2) Run ping command to check if its installed properly

3) Install redis npm module.

4) Create redis client

We will use Hash data structure

➔ [Hash commands](#)

➔ We will use HMSET to set our user

➔ HDEL to delete our user

➔ And HGETALL to get all user information

The next steps are ...

Summary
